

Pre-Admission Examination (PAX-RN)

Overview of the NLN Pre-Admission Exam (PAX)

The National League for Nursing Pre Admission Examination (NLN PAX) for registered nursing programs "PAX-RN" is a standardized entrance exam for potential nursing students who seek admittance into nursing schools nationwide.

Northwest State Community College is requiring students to take the pre admission exam and receive a score \geq 50th percentile for each of the three areas tested in order to be admitted to the nursing program. It is recommended that students complete the admission requirements of Biology, Chemistry, MTH 090 and any developmental English courses needed prior to attempting the pre admission exam.

The NLN PAX-RN is comprised of three main areas: Verbal skills, which consist of both word knowledge and reading comprehension; Mathematics, which includes basic calculations, word problems, and incorporates algebra, geometry, conversions, graphs, and applied mathematics; and Science, which examines general biology, chemistry, physics, and earth science.

Each Pre-Admission Exam includes three one-hour multiple-choice tests. (Exams contain experimental items for purposes of future test development. These items are not included in the examinees' scores.) The first section is Verbal Ability, followed by Mathematics and Science. The entire NLN PAX must be taken during one session.
