Program Administrator

Associate of Applied Science in Early Childhood Development

This degree in the early childhood development (ECD) program is designed specifically for the individual who wants to provide child care services through ownership and/or management of a child care program. The degree blends the early childhood pre-kindergarten courses, emphasizing growth and development of the child from birth to age 8, with business courses emphasizing good management and supervision practices. Many preschool teachers who advance to director positions will find this technology helpful in making the transition from classroom teacher to program manager.

The student must have day-time availability for field placements. All students are required to have a documentation file which includes: a recent medical statement, conviction statement and records check through the Bureau of Criminal Investigation and Identification and the FBI. The appropriate forms are available from ECD personnel and/or the Division Secretary. Specific program policies are stated in the ECD/EDP/EDU Student Handbook. Students must also show completion prior to graduation of standard first aid, community CPR, common childhood illness recognition, and child abuse and neglect training through additional college courses or approved community providers.
