

Associate of Applied Science in Early Childhood Development

The early childhood development (ECD) degree program prepares individuals for teaching positions in child care facilities, Head Start centers, and pre-schools as well as provides professional training for in-home childcare providers. The curriculum integrates classroom and field experiences to provide the student with the opportunity to apply skills and techniques in fostering the young child's social, emotional, physical, creative and cognitive growth.

The student must have day-time availability for field placements. All students are required to have a documentation file which includes: a recent medical statement, non-conviction statement and records check through the Bureau of Criminal Investigation and Identification and the FBI. The appropriate forms are available from ECD personnel and/or the division secretary. Students must also show completion of standard first aid, community CPR, common childhood illness recognition, and child abuse and neglect training through additional college courses or approved community providers. Specific program policies are stated in the ECD/EDU/EDP Student Handbook.

This program is approved by the Ohio Department of Education for the Pre-Kindergarten Associate License. An ECD student who wishes to be recommended for the license must formally apply for admission to the Pre-K Associate License program and meet the criteria of the program as stated in the ECD Student Handbook.
