

Associate of Applied Business in Office Administrative Services

A management team is complete only with a qualified administrative staff. The office administrative services technology develops well-trained graduates for positions in business and in governmental agencies as principal assistants to the managers and administrators of industrial corporations, financial institutions, colleges and schools, hospitals, clinics, law firms, governmental agencies and small businesses.

Graduates' skills include records management, keyboarding, operating word processing software programs on the PC, accounting, and composing business letters and reports. They also prioritize work, process mail, arrange business trips, make appointments, answer the phone, operate photocopy machines and assist in routine office duties. They may supervise other office employees.

Career Outlook

This occupation is one of the largest in the United States. Employment opportunities should be very good, especially for those who have obtained excellent communication skills. Although many of the tasks that secretaries and administrators perform have become automated, it will be those tasks which require personal contact and communication which will continue to play a key role in the office activities of most organizations. Those duties include planning conferences, receiving clients and giving staff instructions. It is expected that several hundred thousand administrative assistant positions will be open annually throughout the U.S.
