Cyber security is a relevant topic right now. Regardless of the type of business you operate, if you work online you are at risk. Cyber security is not just a technology based issue. Organizations must incorporate cyber security best practices into their day-to-day operations. They must also be prepared to respond to a cyber attack, restore operations and ensure that the company's assets and reputation are protected.

CYBER SECURITY: Confidentiality, Integrity, Availability FORUM Wed. June 21st 2017

SESSION TOPICS:

1

Risk Management – A cyber security breach will cost your business. Lost revenue, lawsuits, and damaged reputation could severely impact or even shut down your company. Learn how risk management can improve your security hygiene.

2

Culture Management - Establishing a cyber security culture advocates the need that everyone, including management, has an equal part in cyber security. Your employees may be the key to letting a cyber attack reach your company. Learn how to create a culture of safety without generating panic.

3

Forming an Incident Response Team (IRT) – When managing the aftermath of a security breach or attack, the goal is to handle the situation in a way that limits damage and reduces recovery time and costs. Learn how to form a well-prepared IRT.
